## 1 Collect and Merge ClinVar Data

## 1.1 Import ClinVar VCF

## Processed ClinVar data frame  $87074 \times 14$  (selected rows/columns):

## 1.2 Merge ClinVar with 1000 Genomes and ExAC

#### ## Breakdown of ClinVar Variants

Subset_ClinVar	Number_of_Variants
Total ClinVar	87074
LP/P-ClinVar	27570
LP/P-ClinVar & ACMG	5785
LP/P-ClinVar & ACMG & ExAC	971
LP/P-ClinVar & ACMG & 1000	181
Genomes	

#### ## Breakdown of ACMG-1000 Genomes Variants

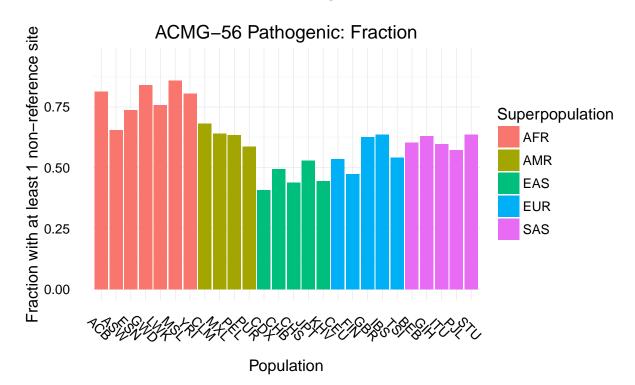

Subset_1000_Genomes	Number_of_Variants
Total 1000_Genomes & ACMG	139335
1000_Genomes & ACMG & ClinVar	3099
1000_Genomes & ACMG &	181
LP/P-ClinVar	

#### ## Breakdown of ACMG-ExAC Variants

Subset_ExAC	Number_of_Variants
Total ExAC & ACMG	58873
ExAC & ACMG & ClinVar	7426
ExAC & ACMG & LP/P-ClinVar	971

## 2 Summary Statistics

## 2.1 Fraction of Individuals with Pathogenic Non-Reference Sites

ACMG-56 Pathogenic: Mean in ExAC

Superpopulation

AFR

AMR

EAS

Population

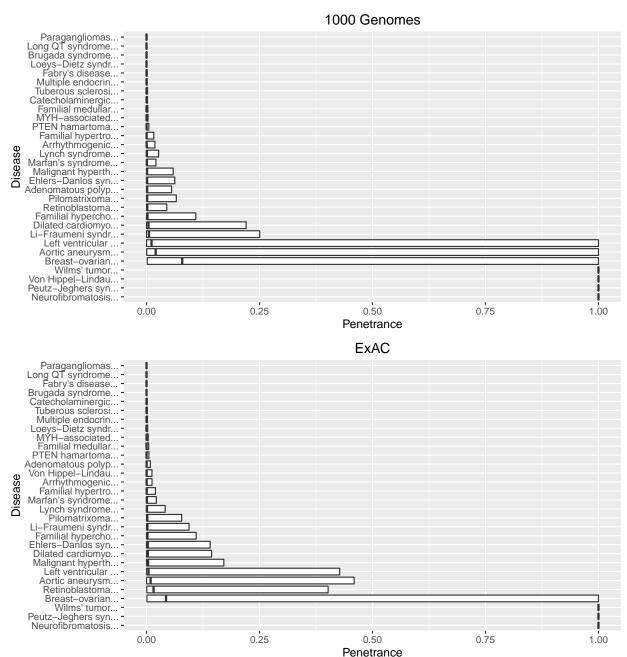

AFR

SAS

### 3 Penetrance Estimates

### 3.1 Max/Min Penetrance as a Function of P(D) and P(V|D)

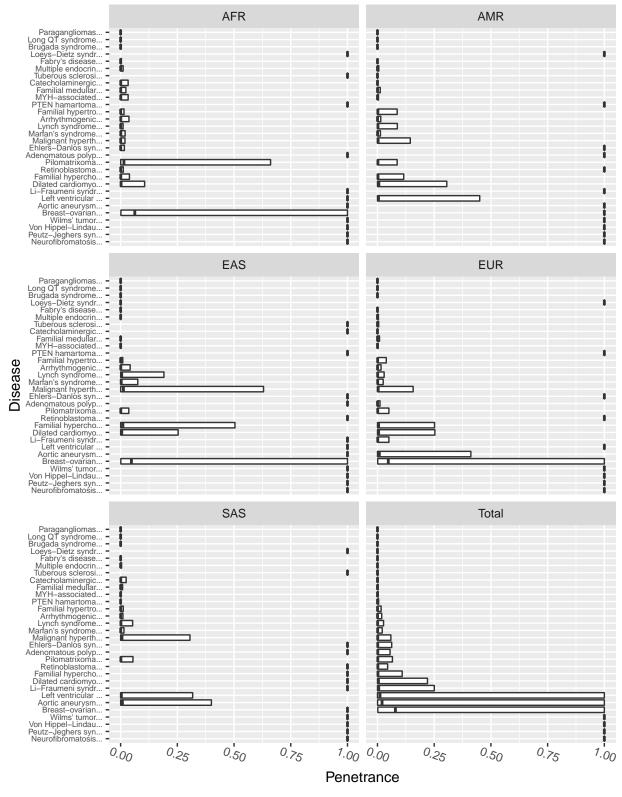

The left end of the boxplot indicates P(D) AND P(V|D) = lower value, the bold line in the middle indicates P(D) AND P(V|D) = geometric\_mean(values), the right end of the boxplot indicates P(D) AND P(V|D) = upper value.

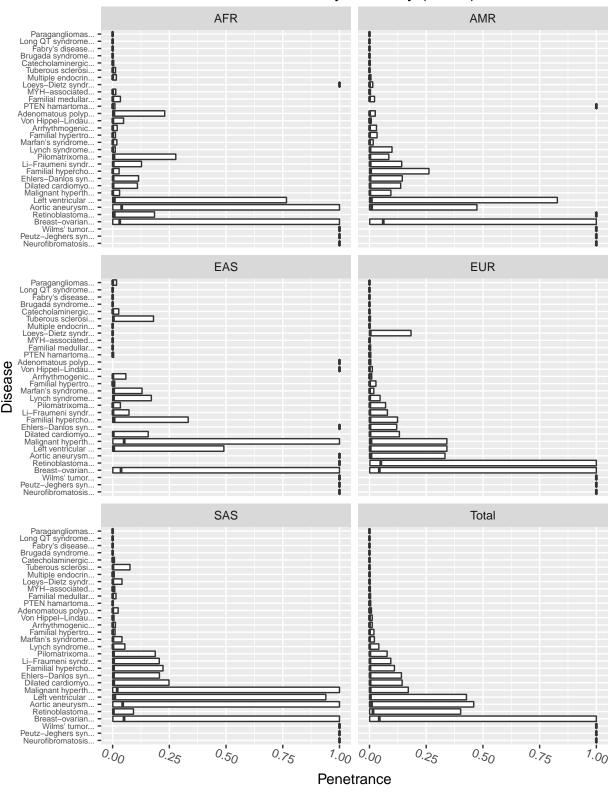

Note: Prevalence ranges of 5x were assumed for all point estimates of prevalence. For example: a point estimate of 0.022 would be given the range 0.01-0.05.

#### 3.2 Penetrance Estimates by Ancestry

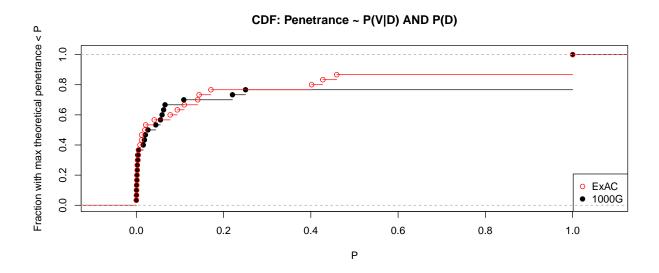

## Penetrance by Ancestry (1000 Genomes)

## Penetrance by Ancestry (ExAC)

### 3.3 Empirical CDFs for All Penetrance Plots

### 3.4 Comparing Mean Penetrance between ExAC and 1000 Genomes

#### Penetrance Means: ExAC v. 1000 Genomes Breast-ovarian... Retinoblastoma... Aortic aneurysm... 1e-02 -Left ventricular ... Malignant hyperth.. Dilated cardiomyo... Penetrance\_ExAC Li-Fraumeni syndr... Pilomatrixoma... Marfan's syndrome... Arrhythmogenic... PTEN hamartoma... Familial medullar.. Adenomatous polyp... Multiple endocrin.. MYH-associated... Loeys-Dietz syndr... Tuberous sclerosi... Catecholaminergic... 1e-05 -Fabry's disease... Long QT syndrome... Paragangliomas... 1e-06 1e-02 1e-01 1e+00 1e-06 1e-03 Penetrance\_1000\_Genomes

The Pearson correlation is 0.94. Max penetrance values computed using 1000 Genomes are 1.7-fold larger than those computed using ExAC.
